

Summer STREAM Camp

Blessed Sacrament School

July 17-20, 2017 ~ 9:00am to 12:00pm

STREAM is a collaborative, multi-disciplinary initiative that seeks to link together several subject areas in a seamless way. At the camp, students will explore each of the STREAM subject areas- **S**cience, **T**echnology, **R**eligion, **E**ngineering, **A**rts, and **M**ath- through hands on, engaging activities.

Our future engineers will explore the engineering design process using an “Engineering Adventures” unit from the Museum of Science’s Engineering is Elementary program called: *Avalanche: A Slippery Slope*. The children will be able to work with other participants to plan, imagine, create, and explore avalanche engineering.

This camp is open to all students entering the 4th and 5th grade this September. The registration fee for the week is only **\$50**, as most of the camp’s costs will be covered through the school’s STREAM grant from the Catholic Schools Foundation.

Please complete and return the bottom of this form to the main office by Friday, June 2. Space is limited, and seats will be filled on a first-come, first-served basis.

Contact Mrs. Carroll (ncarroll@blessedsacrament.org) with any questions.
